

NDPE Implementation Reporting Framework For Palm Oil

The **No-deforestation, No-peat and No-exploitation** (NDPE) Implementation Reporting Framework, known as NDPE IRF, is a reporting tool designed to help companies to systematically understand and track progress in delivering NDPE commitments in their palm oil supply chains. In the Figure 1 picture you can observe categories of progress for supply chain volumes form palm oil in the implementation Reporting Framework.

Figure 1 - Categories of progress for supply chain volumes form palm oil in the implementation Reporting Framework

While in the Figure 2 and Figure 3 you observe data referred to year 2021 for CPO purchased by Unigrà (origin Latin America). CPO purchased by Unigrà from different origins it is 3% of the total.
